Job Description

Ready to turn data into impact? Join us and help shape the digital future of Amgen Breda.

At Amgen, everything starts with one mission: to serve patients. At our European packaging and distribution hub in Breda, we ensure life-changing medicines reach patients across Europe and the world – reliably, efficiently, and always with purpose.

Within this ecosystem, the ABR Data & Analytics team plays a crucial role: transforming how data is used, unlocking insights, and building the digital foundations that power smarter decisions. Now, we are looking for 2 enthusiastic interns to join our journey.

This isn't just an internship – it's your chance to help build the data infrastructure of the future and work with state-of-the-art cloud technologies.

LIVE**This could be your everyday**

As one of our **2 Data & Analytics interns**, you will dive into impactful digital and data-driven initiatives, with your scope tailored to your background and interests.

Your Mission

You'll contribute to a variety of exciting activities such as:

- Creating and documenting **Data Foundation Layer tables** in the Amgen Datalake
- Supporting the build of ABR's data foundation for analytics, SME projects, and **GenAI LLM applications**
- Working on **data-engineering or data-science projects**, including pipeline development, ML prototypes, and **PowerBI dashboards**
- Testing and developing **GenAI LLM deployments**, such as Databricks Genie or ChatGPT–Databricks connectors, enabling **"talk to your dataset"** capabilities

You will be embedded in a collaborative, international environment where innovation, curiosity, and hands-on learning are encouraged every day.

Deliverables

By the end of your internship, you will have:

- Contributed to one or more impactful Data & Analytics initiatives
- Delivered tangible outputs like data pipelines, dashboards, or validated prototypes
- Supported the expansion of the Amgen Breda Data Foundation with reusable and analytics-ready data tables
- Strengthened the data infrastructure powering ABR's digital transformation

These deliverables will become strong portfolio pieces for your future career.

WIN

What we expect of you

We are looking for **2 motivated, proactive candidates** with a passion for data, problem-solving, and modern technologies.

Ideal profile:

- Background in **Data Science, Computer Science, IT, Engineering**, or similar
- Basic experience with SQL, Python, or PowerBI (Databricks is a plus)
- Analytical mindset and structured problem-solving
- Curiosity and ability to quickly learn new tools
- Strong communication in English
- Comfortable working both independently and in a cross-functional, international setting

Academic-related data experience is a plus — but motivation and willingness to grow matter even more.

THRIVE

What we offer

As we create treatments that take care of others, we ensure our teammates thrive — personally and professionally.

You'll benefit from:

- A dynamic and international environment at one of the **World's Best Workplaces**
- A supportive manager and team to coach your journey
- Professional development opportunities through the Amgen internship program
- Monthly Lunch & Learn sessions and a Final Poster Session
- Vibrant on-site facilities: **gym**, vitality program, healthy cafeteria
- A flexible work arrangement (office + work-from-home)
- An internship fee
- Opportunities to apply for temporary or permanent roles at Amgen

Eligibility

You must be currently enrolled at a **Dutch HBO or WO university**.
